**CLOVER TECHNOLOGIES GROUP
INTRODUCES NEW ECO-FRIENDLY TONER CARTRIDGES**

Clover expands environmental sustainability initiatives

CHICAGO (September 1, 2009) – Clover Technologies Group Inc., a global leader in closed-loop environmental solutions, announced today that it is launching a remanufactured laser toner cartridge containing bio-based toner.

This new environmentally-friendly product will be marketed under Clover's Responsible brand and uses patent-pending BioBlack™ toner. Toner-based printer cartridges made with BioBlack™ have the highest 'bio' content of any printer cartridge currently on the market, according to independent third-party testing. Bio-based toner helps reduce the consumption of petroleum-based fuels and promotes environmental sustainability.

Not only is this new product ideal for eco-conscious businesses and consumers, it is also pending confirmation for the USDA BioPreferredSM program. The BioPreferredSM program requires government agencies to purchase bio-based products when using their government purchase cards.

Clover has long been a leader in the environmental sustainability movement. Clover is the largest collector and remanufacturer of empty cartridges in the aftermarket industry, with over 5 million empties collected every month. Clover is also the only company in the aftermarket industry that is able to offer its clients a true vertically-integrated, closed-loop environmental solution, complete with the industry's only grinding facility, used to reclaim and remanufacture every component from the empty cartridges it collects, and a zero landfill waste policy.

"We are very excited to be one of the first companies to market with a bio-based toner cartridge. This is the logical next step in demonstrating Clover's steadfast commitment to preserving natural resources and protecting the environment," said Jim Cerkleski, Chief Executive Officer of Clover Holdings, Inc.

Clover's Responsible BioBlack™ cartridges are remanufactured in Clover's North American ISO 9001:2000-certified facilities and undergo stringent quality assurance checks. All of Clover's imaging supplies are backed with a 100% satisfaction guarantee warranty.
